Open-Access License

No Permission Required

PLOS applies the [Creative Commons Attribution License](#) (CCAL) to all works we publish (read the [human-readable summary](#) or the [full license legal code](#)). Under the CCAL, authors retain ownership of the copyright for their article, but authors allow anyone to download, reuse, reprint, modify, distribute, and/or copy articles in PLOS journals, so long as the original authors and source are cited. **No permission is required from the authors or the publishers.**

In most cases, appropriate attribution can be provided by simply citing the original article (e.g., Kaltenbach LS et al. (2007) Huntingtin Interacting Proteins Are Genetic Modifiers of Neurodegeneration. *PLOS Genet* 3(5): e82. doi:10.1371/journal.pgen.0050082). If you plan to reuse is not part of a published article (e.g., a featured issue image), then please indicate the originator of the date of the journal in which the item appeared. For any reuse or redistribution of a work, you must also make clear the license was published.

This broad license was developed to facilitate open access to, and free use of, original works of all types. Applying this strategy will ensure your right to make your work freely and openly available. Learn more about [open access](#). For queries about the
